ALOHA ONLINE RESERVATIONS

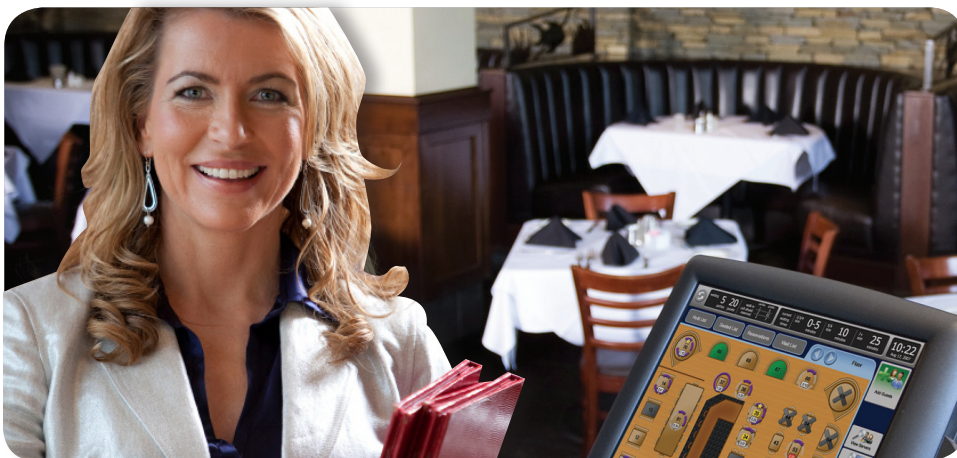

Introducing Aloha Online Reservations, a solution offering 24/7 online access to guests booking reservations that integrates with Aloha's Guest Manager application.

### PROVIDE CONVENIENCE WITH REAL-TIME RESERVATIONS

- Aloha Online Reservations is fully integrated with Aloha's Guest Manager in-store solution – communicating directly with the in-store reservation book in real time.
- Connects to the restaurant to immediately check availability in the Guest Manager reservation book.
- All guest data is captured and managed within one integrated reservation database.
- Reservations booked by the guest online are entered immediately in the in-store Guest Manager reservation database.
- Guests receive email confirmations and reminders for both in-store and online reservations.

### PROTECT YOUR BRAND AND YOUR GUESTS

- All reservations are originated from your restaurant's website, enabling you to market and promote your website to guests for booking reservations.
- Restaurants receive their own individual URL that guests are directed to for checking availability and booking a reservation. This unique website can display your restaurant's logo and promotional message to maintain brand consistency with the consumer.

### INCREASE RESERVATIONS WITHOUT ESCALATING COSTS

Aloha's Online Reservations solution is available for an economically fixed monthly subscription fee per location, allowing you to create marketing campaigns that drive increased online reservations without escalating costs.

### GET UP AND RUNNING QUICKLY

Aloha's Online Reservation is easy to implement. Simply add the Aloha Online Reservation button, either the one that is provided, or one created by you, to your website, and assign your restaurant's Radiant-provided online reservation URL to that button. Your guests can start booking online reservations immediately.

### FEATURES INCLUDE

- One customizable reservation database for both in-store and online reservations.
- Limit the number of available slots for online reservations.
- Set how far in advance reservations can be booked online.
- Set lead time required for booking online reservations.
- Capture and manage all guest information through one integrated guest database.
- Allow guests the ability to specify requests or provide notes when making online reservations.

### BENEFITS

- Maximizes guest convenience with 24/7 online access for reservation booking.
- Drives customers to your own website.
- Easily budget for fixed monthly fee.
- Enhances and expands your customer database.
