

# Reporting

The LaneHawk® Enterprise Manager is a software application that manages a distributed set of LaneHawk in-store servers deployed in a retail enterprise.

The LaneHawk Enterprise Manager keeps track of LaneHawk server status, downloads audit data, updates software and image models, and generates reports to detail LaneHawk's performance. The LaneHawk Enterprise Manager can be run in a Linux or Windows environment. The Enterprise Manager can be used in conjunction with IBM's RIF and SIF frameworks, IBM WRS, Tivoli, and Microsoft SCOM.

**The Enterprise Manager is comprised of four major components:**

**Enterprise Status** **OK**

- Servers Not Provisioning: 0
- Servers with Errors: 0
- Servers with Issues: 0
- Servers with no Issues: 6

Legend: LCLs (Green: 7, Yellow: 0, Red: 0), PCH (Green: 0, Yellow: 0, Red: 0)

**Alerts**

- New Errors: 0
- New Warnings: 352
- New Info: 77

**Software Deployed**

SW Version	Detail	Servers
v2.5.7	v2.5.7 (Linux)	2
v2.5.10	No details	3
v2.5.8	No details	1

**Modelsets Deployed**

Model Version	Detail	Servers
142	No details	1
146	No details	2
150	No details	1
155	No details	1
156	No details	1

## 1. Navigation Tree

The Navigation Tree shows all stores in the enterprise that are using LaneHawk.

## 2. Context Selection Tabs

These tabs allow the user to select different data views and logical operations such as reports, data collection, status and updates.

## 3. Active Task List

The Active Task List shows information about the tasks that are currently active.

## 4. Context View

The Context View area shows information related to specific context tabs selected.

## Reports

One of the principal features of the Enterprise Manager is its ability to analyze and generate reports from the LaneHawk audit data and POS Tlog data. A typical report is Risk Transactions (where cashiers may be attempting to pass the system).
